Canine Food Recommendations

- ❖ All of these foods can be found at local pet stores
 - ❖ Be sure that your dog's food has grain included
 - A 2018-2019 study by the FDA found a correlation between grain-free diets and the development of dilated cardiomyopathy (DCM), a type of heart disease.
 - For more information on grain-free diets and DCM, please visit:
<https://www.fda.gov/animal-veterinary/outbreaks-and-advisories/fda-investigation-potential-link-between-certain-diets-and-canine-dilated-cardiomyopathy>
-

- ❖ Purina Pro Plan
 - ❖ Royal Canin
 - ❖ Hill's Science Diet
 - ❖ Eukanuba
 - ❖ IAMS
-

- ❖ When making a food switch, it is always recommended to **transition slowly** in order to avoid gastrointestinal upset:
 - ❖ Day 1-3: 75% current food, 25% new food
 - ❖ Day 4-6: 50% current food, 50% new food
 - ❖ Day 7-10: 25% current food, 75% new food
 - ❖ Day 11: 100% new food
